

# BELLEZA ULTRASONIX

Just what you need  
to create waves  
in the beauty business.

**Belleza**  
stay young  
ULTRASONIX

**BELLEZA Ultrasonix** uses ultrasound waves to create air bubbles on the outside of the skin because the surface of the skin is not smooth. By holding the head of the Ultrasonix unit tightly against the skin increases transdermal delivery. Which ensure easy penetration of cosmetic products into the skin.

It can also be used in Thermal mode to provide sub dermal heating wherever desired. This causes thermal necrosis of sub dermal cellulite and provides a smoothing effect.

## SPECIAL FEATURES

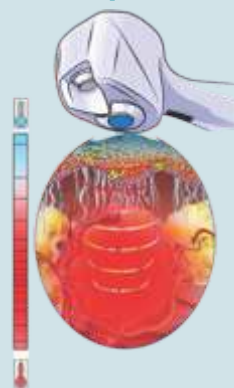

- ~ Portable
- ~ No needles - Less traumatic - painless
- ~ Thermal Mode control is provided.
- ~ Has facility to connect it to Belleza Electroporation system for combination treatment to enhance drug delivery.

## APPLICATIONS:

- ~ Cellulite
- ~ Local fat deposits - xanthelasma, lipoma
- ~ Alopecia
- ~ Rejuvenation - wrinkles, skin tightening
- ~ Hyperpigmentation and melasma
- ~ Body contouring

## Belleza Ultrasonix- The precise Technology

*The mechanical effect of ultrasound energy opens access to tissue which was resistant before. Ultrasonix precisely targets deeper fat layers. There is minimum heating effect on the skin of the patient.*

*As part of the process, ultrasound waves help to increase fibrotic fat structures, causing separation of the cell defensive formation into individual units. The exposed cells are then more isolated and accessible and responsive to treatment.*
